

CY22 Supply Corps Major Command Ashore Slate

It is my pleasure to announce the Captain Major Command Ashore assignments for calendar year 2022. Selection and assignment to these key leadership positions represent years of hard work and merit exemplifying the Navy and Supply Corps' core values. Each of these officers has spent their careers cultivating the acquisition, supply chain management, operational logistics, and leadership skills needed to project forces, generate readiness, and sustain our naval forces worldwide in order to deter our adversaries and defend our homeland. I have the utmost faith and confidence that these leaders will continue to build and sustain the trust and accountability their subordinates and mission partners require to achieve mission success. A commander's ability to carry out his or her charge of command is the single most important factor in enabling command climate conditions for enduring success. I charge each of you to continue to lean in and embrace opportunities available to meet our current and future mission challenges.
